Model 72103R-462 SmartServer 2.2 PL Pro with External Coupling	Replaced by new model	Model 72103R-463 SmartServer 2.2 SR8 PL Pro with External Coupling	December 2018
Model TBD U60 TP-1250	New product		Available Now

The i.LON 600 products have been replaced with the new i.LON 700 Edge Server combined with a U60 network interface expansion module. The i.LON 700 provides the IP-852 routing and remote network interface capabilities provided by the i.LON 600, and adds multi-channel support for cost-effective network expansion. For installation instructions and guidance on how to replace an i.LON 600 with an i.LON 700 plus U60, see www.echelon.com/docs/iot.

The following four SmartServer 2.2 products have been replaced with the listed new models with a new flash memory that requires updated SmartServer firmware included with the SR8 release:

- Model 72101R-432 → Model 72101R-433
- Model 72101R-442 → Model 72101R-443
- Model 72105R-442 → Model 72101R-443

The new SmartServer 2.2 products cannot be downgraded to earlier versions of the SmartServer software due to the memory driver changes required to support the new flash memory. If a new SmartServer 2.2 is downgraded to a software release prior to the 2.2 SR8 release, the unit will become inoperable and cannot be repaired.

The Model 72102R-442 SmartServer 2.2 product with an integrated modem has been discontinued, and has been replaced with the Model 72101R-443 SmartServer 2.2 model without a modem combined with an external modem.

For the products that have been replaced with new products, Echelon will continue to sell the current products for a limited time in order to support your transition to the new products.

All purchase orders for discontinued products are limited to stock on hand, and are subject to Echelon's standard minimum order requirements. Customers with current supply agreements with Echelon may have alternate End-of-Sale terms.

Replacement products are identified in the above table. We apologize for any inconvenience this notice may cause and look forward to your continued interest in our products. Please contact your local Echelon representative for any inquiries.
